Submit Now-Andrew Chak 2003 Usability is not enough. This book shows what it takes to design a site so browsers become buyers: the ultimate measurement of success for an e-commerce site. Designing Persuasive Web Sites: Submit Now examines how customers search, evaluate, and make decisions realistically-not using marketing guesstimates. This book focuses on changing the mindset from selling to customers to helping them buy. It begins by exploring how customers make decisions and how that integrates with the online experience. It presents tangible design ideas that can be instantly applied to sites to make them more effective. Real examples are used to provide insight and inspiration that can be directly applied to a multitude of sites. The book provides a simplified description of the essential process necessary for designing a site that gets visitors to click. It concludes with guidelines to for designing any transaction-oriented site.

The Academy: Book 2-Chad Leito 2014-04-01 Every six months, 450 fifteen-year-olds are kidnapped from their homes across the world. These kidnappings happen in the span of a week, as reliable as clockwork. The victims don't know each other, or their kidnappers. The fifteen-year-olds either end up with a 'missing persons' file gathering dust in a filing cabinet, or they are assumed dead. No one ever discovers what happens to them. The families move on, forever missing their lost loved one. Unknown to them, their child, grandchild, or sibling, has been taken to the Academy. The Academy, as its members will boast, is the most secretive, powerful organization in the world. The workings of the organization are revealed on a need-to-know basis, and the organization has decided that no one, other than its most trusted members, need to know its true business. Outsiders don't even know it exists. Occasionally, a hunter or hiker will stumble upon the Academy's remote location. They are quickly taken care of. When Asa Palmer, age fifteen, is out running in the woods behind his house, he is taken. Twelve hours later, after being tied and bound, and transported through an underground train station, he finds himself amidst a series of beautifully crafted structures that rest in between a circle of five secluded mountains. He has been chosen as a candidate for the Academy. Each six months, the Academy kidnaps more recruits than they can actually use. For Asa Palmer to live he must undergo body-altering mutations and compete with his cohorts in a series of dangerous and strategy ridden tasks to prove that he is worthy of the Academy's time. This book follows Asa Palmer through his second semester in the Academy. The work is 197,000 words long.

Imagined Democracies-Yaron Ezrahi 2012-10-15 This book proposes a revisionist approach to democratic politics. Yaron Ezrahi focuses on the creative unconscious collective imagination that generates ever-changing visions of legitimate power and authority, which compete for enactment and institutionalization in the political arena. If, in the past, political authority was grounded in fictions such as the divine right of kings, the laws of nature, historical determinism and scientism, today the space of democratic politics is filled with multiple alternative social imaginaries of the desirable political order. Exposure to electronic mass media has made contemporary democratic publics more aware that credible popular fictions have greater impact on shaping our political realities than do rational social choices or moral arguments. The pressing political question in contemporary democracy is, therefore, how to select and enact political fictions that promote peace and how to found the political order on checks and balances between alternative political imaginaries of freedom and justice.

Gossie Padded Board Book-Olivier Dunrea 2015-03-17 Gossie is a gosling who likes to wear bright red boots every day, no matter what she is doing, and so she is heartbroken the day the boots go missing and she can't find them anywhere.

LC21-National Research Council 2001-02-23 Digital information and networks challenge the core practices of libraries, archives, and all organizations with intensive information management needs in many respectsâ€"not only in terms of accommodating digital information and technology, but also through the need to develop new economic and organizational models for managing information. LC21: A Digital Strategy for the Library of Congress discusses these challenges and provides recommendations for moving forward at the Library of Congress, the world's largest library. Topics covered in LC21 include digital collections, digital preservation, digital cataloging (metadata), strategic planning, human resources, and general management and budgetary issues. The book identifies and elaborates upon a clear theme for the Library of Congress that is applicable more generally: the digital age calls for much more collaboration and cooperation than in the past. LC21 demonstrates that information-intensive organizations will have to change in fundamental ways to survive and prosper in the digital age.
