Classic Heathkit Electronic Test Equipment-Jeff Tranter 2013-10-28 Heathkit was world renowned as a manufacturer of electronics in kit form. This book covers Heathkit's test equipment, starting with a brief history of Heathkit, an overview of the test equipment product lines and tips on buying and restoring vintage test equipment from sources like eBay. Separate chapters cover the major categories of component testers and substitution boxes, frequency counters, meters, oscilloscopes, power supplies, signal generators, tube testers and checkers and miscellaneous test equipment. Each chapter includes one or more "In-Depth" sections that look at a representative model from the author's Heathkit collection covering its features, operation, and notable quirks or trivia. The appendix provides a list of references and resources including books, web sites, and suppliers of parts, manuals and related products and services as well as a detailed product listing of every known model of test equipment produced by Heathkit.

Smart Home Hacks-Gordon Meyer 2004-10-25 So much of what is commonplace today was once considered impossible, or at least wishful thinking. Laser beams in the operating room, cars with built-in guidance systems, cell phones with email access. There's just no getting around the fact that technology always has, and always will be, very cool.But technology isn't only cool; it's also very smart. That's why one of the hottest technological trends nowadays is the creation of smart homes.At an increasing rate, people are turning their homes into state-of-the-art machines, complete with more switches, sensors, and actuators than you can shake a stick at. Whether you want to equip your home with motion detectors for added security, install computer-controlled lights for optimum convenience, or even mount an in-home web cam or two purely for entertainment, the world is now your oyster. Ah, but like anything highly technical, creating a smart home is typically easier said than done.Thankfully, Smart Home Hacks takes the guesswork out of the process. Through a seemingly unending array of valuable tips, tools, and techniques, Smart Home Hacks explains in clear detail how to use Mac, Windows, or Linux to achieve the automated home of your dreams. In no time, you'll learn how to turn a loose collection of sensors and switches into a well-automated and well-functioning home no matter what your technical level may be.Smart Home Hacks covers a litany of stand-alone and integrated smart home solutions designed to enhance safety, comfort, and convenience in new and existing homes. Kitchens, bedrooms, home offices, living rooms, and even bathrooms are all candidates for smart automation and therefore are all addressed in Smart Home Hacks.Intelligently written by engineering guru and George Jetson wannabe, Gordon Meyer, Smart Home Hacks leaves no stone unturned. From what to purchase to how to use your remote control, it's the ultimate guide to understanding and implementing complete or partial home automation.

Practices of Relations in Task-Dance and the Event-Score-Josefine Wikström 2020-10-30 In this study, Josefine Wikström challenges a concept of performance that makes no difference between art and non-art and argues for a new concept. This book confronts and criticises the way in which the dominating concept of performance has been used in Art Theory, Performance- and Dance Studies. Through an analysis of 1960s performance practices, Wikstrom focuses specifically on task-dance and event-score practices as well as through examination of the key philosophical concepts that are inseparable from such a concept of art, and are necessary for the reconstruction of a critical concept of performance such as: 'practice', 'experience', 'object', 'abstraction' and 'structure'. This book will be of great interest to scholars, students and practitioner across dance, performance art, aesthetics and art theory.

The Electronic Home Advisor-Howard J. Blumenthal 1988 Tells how to select and buy televisions, video equipment, car stereos, speakers, CD players, turntables, cassette decks, headphones, radios, microwave ovens, coffee makers, telephones, computers, and cameras
