The BMW Century-Tony Lewin 2016-09-30 Relive the first one hundred years of Germany's best two- and four-wheeled rides. Established in 1916, BMW is one of the auto and motorcycle industry's oldest and most-respected car and motorcycle manufacturers. Over the past century, the company went through myriad developments. The BMW Century chronicles this remarkable transportation company through images of the cars and motorcycles it manufactured, from the 1923 R32 motorcycle to sleek electric cars of today. This handsome volume is filled with images, history, and in-depth looks at the incredible machines BMW created year after year. The BMW Century showcases how the company's new visionary team systematically rebuilt BMW in the post-World War II years into the spectacular success we know today - that is, a company with sales projected to be upwards of two million cars annually by 2016, led by its 3-series, the best-selling luxury-performance car in the world. BMW's motorcycle division is no less legendary. It began with the 1923 avant-garde R32, which featured a 180-degree, horizontally opposed twin, the engine configuration that would become BMW's hallmark. Along the way, BMW would use that configuration to power groundbreaking machines like the R90S, R100RS, and R80GS. Beginning in 1983, they would add three- and four-cylinder machines to their offerings, culminating in today's spectacular S1000RR sport bike. From the pre-war motorcycles to the iconic R-series twins of the 1970s and 80s to the mighty M-series cars and superbikes of today, The BMW Century offers a full review of German engineering at its finest. The book is illustrated with hundreds of historic, contemporary, and racing photographs - many sourced from BMW's archives - and detailed text relating the BMW's full history. This is the one volume no BMW aficionado can be without.

BMW Classic Coupes, 1965 - 1989-James Taylor 2014-11-30 A definitive guide to BMW's high-performance classic coupes, tracking their rising success from 1965 to 1989. After the doldrums of the post-war years, BMW had felt the need for a flagship grand touring coupe. The 507 of the late 1950s and the 3200 CS that replaced it in the early 1960s may not have made much money for the company, but they were a reminder of its aspirations. Then in 1964, a striking new coupe emerged from the building blocks of the latest saloon car range. The 2000 and 2000 CS, with their feisty 2-litre 4-cylinder engines, were the affordable foundation on which BMW was able to build its next generation of coupes - and what formidable machines those were! This definitive guide covers BMW's high-performance classic coupes, tracking their rising success from 1965 to 1989 and includes full specification guides, production histories and original photography. Topics covered include: BMW's

hand-built coupes of the 1950s and the first volume-built models; the mainstream E9 range, with new engines and revised front-end styling; racing success for the 'Batmobile' CSLs, including six wins at the European Touring Car Championship from 1973 to 1979; engineering and development of the luxury E24 range; tuned and modified coupes, including the rare custom convertibles. Fully illustrated with 234 colour photographs.
